

## HOMWORK ASSIGNMENT: WEEK 3

---

### Assignment 01:

1. For the given input files (module5\_ex1\_f1 and module5\_ex1\_f1) based on first fields from file1 and 2, apply the Map side join method for it.
2. For the given weather data set, find out the hot and the cold days of the year. [Any day having max temperature more than 42 is a hot day and the day having minimum temperature less than 8 is a cold day].

Your output should have following fields:

<Date>      <Hot/Cold Day>
