HOMEWORK ASSIGNMENT: WEEK 5

Assignment 01:

1. Create an HBase table 'employee' with two column families 'official' and 'personal'

2. Insert some records to this table (with whatever number of columns you want), update some of them and finally delete the latest record

3. Repeat the same steps as in exercise 2, but this time with a Java API

4. Load the data of the table from step2 in Pig and dump the records to the terminal
